PROJECT NUMBER:
101178736

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Research Executive Agency (REA). Neither the European Union nor the REA can be held responsible for them.

What is EU-ALMPO?

The EU-ALMPO project introduces the EU ALMP Observatory, an innovative initiative aimed at transforming the way Active Labour Market Policies (ALMPs) are designed, implemented, and evaluated across the European Union. By leveraging advanced Artificial Intelligence (AI) tools and a centralised digital platform, the project will enhance policymakers' ability to create effective and inclusive labour market strategies.

PROJECT NUMBER:
101178736

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Research Executive Agency (REA). Neither the European Union nor the REA can be held responsible for them.

Key Objectives

- **Evidence-Based Policy Design:** Enhancing labour market policy effectiveness through data-driven research and analysis.
- **Skills Matching and Development:** Engaging stakeholders to co-design skill strategies at regional and sectoral levels.
- **AI-Powered Analysis:** Developing an expert-led, self-sustaining machine learning system for ALMP evaluation.
- **Real-Time Labour Market Insights:** Aggregating diverse data sources to bridge the gap between job supply and demand.
- **Personalised Policy Recommendations:** Utilising AI-driven tools to tailor interventions based on specific labour market conditions.
- **Collaborative Policy Innovation:** Implementing participatory research and stakeholder engagement to refine ALMPs.
- **Impact Assessment and Continuous Improvement:** Evaluating the effectiveness of labour market interventions to drive sustainable employment.

Our target groups

- **Policymakers** at EU, national, regional, and sectoral levels shaping labour and vocational education policies.
- **Public Employment Services (PES) & Career Advisors** supporting job seekers and workforce development.
- **Individuals Seeking Employment Support**, particularly low-skilled and vulnerable groups.
- **Labour Market Stakeholders** including employers, employees, and social partners.
- **Research Community** focused on labour market trends and policy development.

**effective
and inclusive
labour market
strategies**

Why is the EU-ALMP Observatory Important

- **Improves Labour Market Policy Effectiveness** by providing policymakers with access to comprehensive labour market data and insights.
- **Enhances Skill Development Strategies** by aligning training initiatives with labour market demands, particularly during economic downturns.
- **Supports Policy Innovation & Implementation** by using AI-driven tools to optimise employment strategies and reduce skills mismatches.
- **Fosters Inclusive Labour Markets** by ensuring that interventions effectively address both low and high skilled job vacancies.
